

Veterinary website

Montoya Montes P

1. Introducción

Veterinary website, simple and easy to navigate, showing all the services, prices, location and veterinarians. the main objective is that the user can make an appointment or buy in a simple way.

The page shows a potential client the services and makes it easier to connect with them.

2. Expected List of Features

- Suscribe to news and promo: Users may be interested in news
- Send email to users: Related to the previous point, to have control of users and appointments
- User creation: User control
- Schedule an appointment: Makes it easier for the user and client to have control over appointments
- List of all products: Users can see the services and products offered

3. Market Survey

- <https://www.asPCA.org/> This site had Stay up to date its simple and the page colorfull but user friendly
- <https://www.amcny.org/> The contact Us button contact is simple and easy to locate
- <https://imperialvets.com/> This site had paypal option and an accesibility option that I think it would be a great feature
- <https://www.dakotahillsveterinary.com/our-services> The nav bar show clearly its services
- <https://www.lewisanimal.com/> The header animation and images make the page looks great to user, also all options in nav bar are assorted
